**B.Sc. in Computer Science -91 GPA - Graduated in honor**

**6 months experience** developing web apps with **Angular 9, Nodejs**

**5 years experience with IT** from **IDF computer unit** and **Verint**.

2.5 years experience in **Verint** supporting 6,000 workers with VPN, AD, Azure, Microsoft Exchange, Jira and advanced Cyber tools.

Highly motivated, a hard worker and a team player.

## Experience

**11\2020 – Now Level App, Full-Stack Developer – part time position**

- Building web-applications using **Angular 9 with NodeJS**.  
I use **Git** to build, update, maintain and review the projects.

**2\2019 – Now Verint, IT Specialist – student position**

- supporting 6,000 workers with VPN, AD, Azure, Microsoft Exchange, Jira and advanced Cyber tools.
- During my work I learned how to work under pressure and achieve good results within the company's structure incorporating new technologies that the company deals with.

## Education

**2017 – 2020 Computer Science B.Sc., Holon Institute of Technology - HIT, GPA– 91, Graduated in honor**

- During my study I got high grades on the all developing courses like:  
language C - grade 96.  
OOP with C++ - grade 95.  
Software Engineer, Java course with Design Patterns - grade 97.

**2012 - 2013 Computer Science Class (Thirteen year), Ort Holon, GPA - 95**

- computer technician certificate
- Final project: Yaniv Game developed with Java and OOP

**2009 - 2012 Ort Holon High School**

- Major: computer science - **GPA 95**

## Technical Skills

### SOFTWARE AND PROGRAMMING LANGUAGES

- React, Angular, NodeJS, CSS, JavaScript, jQuery, HTML, Java, C, C++.
- Object Oriented Programming, Design Patterns, Data Structures and Git.
- MongoDB, Firebase.

### Self-Projects

#### 2021 Customer Manager Website - Angular 9, Nodejs and MongoDB

- A website that allows management of customers. Customers are displayed through a material table or cards view.
- After registering on the website, you can manage the customers by adding, deleting, and updating orders or customers details.
- Developed by Angular 9 framework with NgRx using HTML, CSS, and JS on client side, and NodeJS on Server side with MongoDB database.
